Suitable for use indoors and out, fast-acting Zero In® Ant Killer Powder kills ants, woodlice, cockroaches, and many other crawling insects on contact. It has a coverage area up to 15 square metres and will protect your home and garden against re-infestation for up to 12 weeks. The unique puffer-nozzle delivery system allows precise and targeted application, including in hard-to-reach areas where ants commonly nest and travel. Targeted crack and crevice treatment of door and window frames, air bricks, vents, and spaces between patio slabs is also recommended.

DIRECTIONS FOR USE

puffer-nozzle to target cracks and crevices

- Shake the container before use.
- Unscrew outer cap. Snip the end off the crack and crevice spout.
- Point the target nozzle to direct the powder into cracks, crevices and hard to treat areas wherever ants are active.
- Puff the powder into and around the entrance to ants' nests, along ant runs and entry and exit points.
- Repeat treatment as required.
- Always wash hands after use.

Note: Air space is left at the top of this container to enable puffer to function.
†Dependent on treatment area. Re-application will be required after cleaning or vacuuming.

STATUTORY CONDITIONS RELATING TO USE
FOR USE ONLY AS AN INSECTICIDE. Apply product at a rate of 10-25g per square metre. Users must comply in full with all their responsibilities under the Control of Pesticides Regulations 1986 (as amended), and the Control of Pesticides Regulations (Northern Ireland) 1987 (as amended), including complying with all Conditions of Approval. READ ALL PRECAUTIONS BEFORE USE.
HSE No. 9365-GB 9365-NI

This biocidal product contains Permethrin, which can cause severe adverse reactions in cats. Do not use on cats, or items intended to be used by cats. Keep cats away during application.
